

Alaska Fire Standards Council HazMat -Training Record Awareness

Candidate Name: _____ ID#: _____

Training Officer Signature: _____ Date: _____
(When Training Completed)

NFPA 472 2002	Description	Date Trained	Date Tested	Date Student Competency was evaluated	Initials	Comments
AWARENESS						
4.1 General						
4.1.1.2	Additional training meeting applicable DOT, EPA, OSHA laws and other state, local laws.					
4.1.2	When first on scene perform the following tasks: 1. Analyze the incident according to a, b, c. Implement actions consistent with a, b.					
4.2 Analyzing the Incident						
4.2.1	Detecting Hazardous Materials. Given various situations, with or without hazardous materials present, identify those situations where hazardous materials are present, including all the elements of competencies 1-16.					
4.2.2	Given examples of facility and transportation situations involving hazardous materials, identify the material in each situation....					
4.2.3	Given the identity of various hazardous materials, identify the fire explosion, and health hazard information for each material using the current DOT Emergency Response Guidebook.					
4.3 Planning the Response (Reserved)						
4.4 Implementing the Planned Response						
4.4.1	Given examples of facility and transportation incidents, identify the actions to be taken to protect responders and others and to control access to the scene meeting the requirements of items 1-12.					
4.4.2	Given either a facility or transportation scenario involving hazardous materials, identify notifications to be made and how to make them.					
4.5 Evaluating Progress (reserved)						
4.6 Terminating the Incident (reserved)						

Alaska Fire Standards Council HazMat -Training Record Operations

OPERATIONS						
5.1 General						
5.1.1.2	Additional training meeting applicable DOT, EPA, OSHA laws and other state, local laws.					
5.1.2.1	The 1 st Responder shall be able to perform the following tasks: 1. Analyze incident to determine magnitude... 2. Plan an initial response... 3. Implement a planned response... 4. Evaluate the progress of actions taken...					
5.2 Analyzing the Incident						
5.2.1	Given examples of both facility and transportation scenarios involving hazardous materials, survey the incident to identify the containers and materials involved. (include all elements of 5.2.1.1 through 5.2.1.6.					
5.2.2	Given know hazardous materials collect hazard and response information...					
5.2.3	Given an incident involving a single hazardous material predict the likely behavior of the material and its container...					
5.2.4	Estimate the potential harm within endangered areas at a hazardous materials incident, meeting the requirements of items 1-6.					
5.3 Planning the Response						
5.3.1	Given at least 2 scenarios, describe the objective for each problem meeting the requirements of items 1-3.					
5.3.2	Given a simulated facility and transportation problem, identify defensive options for each response, including the requirements of items 1 and 2.					
5.3.3	Given the name of a hazardous material involved determine whether available personal protective equipment is appropriate for a defensive operation, meeting the requirements of items 1 and 2.					
5.3.4	Identify emergency decontamination procedures meeting the requirements of items 1-6.

Candidate Name: _____ ID#: _____

Training Officer Signature: _____ Date: _____
(When Training Completed)

5.4 Implementing the Planned Response						
5.4.1	Given scenarios for facility and/or transportation incidents, identify how to establish and enforce scene control, including the elements of items 1-6.					
5.4.2	Given a simulated facility or transportation incident, initiate the incident management system specified by the emergency response plan...					
5.4.3	Demonstrate the ability to don, work in, doff personal protective equipment related to items 1-9 of the standard.					
5.4.4	Given a plan of action for a HazMat incident demonstrate defensive control actions set out in the plan, meeting the requirements of items 1-6.					
5.5 Evaluating Progress						
5.5.1	Given a simulated incident evaluate the status of defensive actions taken to accomplish the response objectives, meeting the requirements of items 1 and 2.					
5.5.2	Communicate with the Incident Commander and other response personnel as outlined in items 1 and 2.					
5.6 Terminating the Incident (reserved)
