DRONE SEARCH & RESCUE

This 16-hour course teaches crucial components of executing successful drone/UAS search and rescue missions in various environments. 8- hours will be dedicated to hands on scenario based training with night time operations

Topics discussed:

- UAS SAR Procedures
- Search Methods
- Vital Software
- Nighttime Operations
- Additional SAR Tactics

Utilizing personal/agency-issued drones to maximize flight time is encouraged.

Public Safety UAS are active First Responders with decades of public safety and aviation experience, dedicated to training public safety organizations in Drone Operations.
