Subject: DataMaster DMT 100356 moved in Skagway

Attached is the Change in Instrument Status forms for the removal from the old facility and arrival into our new facility along with VOC of before and after the moves, a Diagram showing location in new booking room and photo of booking room with the DataMaster in place and a photo of the new building itself. If there is anything else you need I let me know. The other day the Chief was trying to run someone and he got a blank error and an interference. Subject was a non-drinking subject. I also had an interference on my first attempt at the VOC this morning. I restarted the DataMaster and I haven't had a problem since. The old facility was dusty and dirty with a lot of activity. I'm hoping here with the type of heating system we have it will be much cleaner and hoping the DataMaster will be happier here. ☺ I let you know if I have any more issues though.
