

VCQB® USER COURSE

Course Duration: 3 Days

Vehicle Close Quarters Battle: Vehicle CQB is an accelerated shooting class focused on positional shooting and a critical look at how we have historically fought in and around vehicles. Students will push the boundaries of "traditional" cover and concealment utilizing various cars and trucks in a true 3D environment. Drills will incorporate critical weapon employment while engaging threats in, around, from, over and under vehicles with a heavy emphasis on problem solving. Ballistic demos with a variety of ammunition will be conducted as the class explores ballistic deflection, deformation, penetration, and terminal effect in direct correlation to various vehicle mediums.

VCQB courses are split into four 10-hour blocks of instruction to include hybrid video lessons and 8-hour in-person application-based firearms training. It is recommended that three days of training be scheduled for the student's initial introduction course. Additional days can be added to incorporate additional NLTA opposition drills, injured shooter or low-light VCQB training.

Required Equipment List:

- Uniform BDUs, AWT field uniform or equivalent training attire if assigned to a specialty unit.
- Outdoor clothing appropriate for the season, jacket & rain gear
- Ballistic vest
- Duty belt or tactical belt (normal work setup)
